

Care Manager

Who We Are

Hoosier Family Supportive Living is a locally-owned and operated service provider for the Indiana Medicaid Waiver Program. We offer options and support for caregivers of individuals with significant health concerns who prefer to age & receive care in the comfort of their homes. Our mission is to provide person-centered support tailored to the unique needs of our clients. We seek to empower individuals to continue living full lives outside of a nursing facility, in the care of their loved ones.

Who You Are

A social worker or case manager looking for a contract-based, flexible opportunity to help support Medicaid recipients who have been approved for the Indiana Medicaid Waiver Program. Experience with the Medicaid population is preferred, but not required. Must have ability to utilize own transportation to manage local care recipient visits.

What You'll Be Doing

You will conduct monthly wellness checks with recipients and caregivers in-person and by phone, recording any adverse health events, changes to their medical condition, or residence changes. You will work to build relationships and ask the right questions to ensure clients are receiving the care they need in their homes and the community. You will connect clients to ancillary services such as transportation, food or housing assistance as needed.

If you're motivated by flexible hours and competitive compensation, and are driven by the opportunity to support an underserved community, let's talk!
